experience

Project Designer
Baskervill, Washington D.C 2023 — 2026

— Entrusted with leading key architectural scopes across 20+ workplace, mixed-use, and multifamily projects from schematic design through construction administration, balancing design intent, technical execution, and client objectives.

— Built trusted relationships with architects, consultants, contractors, and 6+ clients, owners, and developers, representing project teams through design presentations, consultant coordination, and client communication.

— Elevated project storytelling through visualization, graphics, and presentation design, developing AI-assisted workflows that help strengthen design communication, marketing pursuits, client engagement, and the firm's visual identity.

— Sought responsibilities beyond the traditional scope of a Project Designer, expanding into construction administration, permitting, life safety planning, business development, and marketing to develop a holistic understanding of both architectural practice and the business behind it.

— Viewed unfamiliar challenges as opportunities to expand technical expertise and professional practice, independently developing new capabilities that earned increasing trust, responsibility, and ownership across project teams.

Architectural Intern
McCarty Holsaple McCarty, Knoxville 2022 — 2023

— Contributed to hospitality, cultural, and education projects through BIM modeling, drawing production, programming, site analysis, consultant coordination, and interdisciplinary project documentation.

— Supported programming, site analysis, environmental performance studies, consultant coordination, and client presentations throughout early design development.

— Participated in QA/QC reviews and sustainable design analyses, strengthening technical documentation, code compliance, and interdisciplinary coordination across multiple project types.

Research Assistant
University of Tennessee, Knoxville 2020 — 2022

— Conducted interdisciplinary research investigating bioluminescent vegetation as responsive architectural systems as part of Professor Rana Abudayyeh's Green Wall Project, producing research graphics published in academic journals and international research platforms.

selected works

Habitat of Wonder
CASA Home for Good — 2025

— Designed a narrative-driven playhouse inspired by themes of imagination and discovery, translating a story-led concept into a collaborative design-build project.

[Re]claiming Identity
Undergraduate Thesis — 2023

— Explored architectural preservation as a framework for negotiating identity, ecology, and collective memory through research-driven adaptive reuse strategies, proposing interventions that balance historical continuity with contemporary occupation.

technical skills

BIM + Documentation
Autodesk Revit, AutoCAD, Bluebeam, BIM 360

Computational Design + 3D Modeling
Rhinceros 3D, Grasshopper, SketchUp

Visualization
Enscape, V-Ray, Lumion, AI-Assisted Visualization

Graphic Design + Communication
Adobe Photoshop, Illustrator, InDesign, Lightroom

Environmental Analysis
ArcGIS, Cove.Tool, CBE Clima

awards

AIA Alice Lehmen Sunday Prize 2025
Best in Show for Habitat of Wonder

Tau Sigma Delta Honor Society Distinguished Design Award 2023
Finalist for Reclaiming Identity

Brewer Ingram Fuller Award Sustainable Design Award 2022
Honorable Mention for Reciprocity

education

University of Tennessee, Knoxville
May 2023 — Bachelor of Architecture

IAAC, Barcelona
Fall 2021

NCARB Record, In Progress

Assoc. AIA
